

HELPING VERBS

Helping verbs, also known as auxiliary verbs, are an essential component of English grammar. They work in conjunction with the main verb to express tense, mood, voice, and other grammatical aspects. These verbs assist in forming various verb phrases and add clarity and precision to the meaning of a sentence. Helping verbs enables us to express different shades of time, such as past, present, and future, as well as the ability, necessity, permission, and intention behind an action.
